Unlocking Sales. Building Trust.

Security Risk Assessment

Know where you stand. Satisfy your compliance obligations. Start here.

WHO NEEDS A SECURITY RISK ASSESSMENT?

PCI-DSS	HIPAA	Cyber Insurance	Enterprise Contracts	Major IT Changes
Required annual risk assessment for any business accepting card payments.	A bona fide Security Risk Analysis is required annually — one of the most cited HHS violations.	Most policies require an annual risk assessment as a condition of coverage.	Vendor agreements increasingly require security risk assessments.	Cloud migration, acquisitions, or new locations can trigger the need for an interim assessment.

Your stakeholders are already asking the questions.

WHAT WE EVALUATE

A CIS Controls-based evaluation across all 18 control areas:

- ✓ Inventory and control of enterprise assets
- ✓ Inventory and control of software assets
- ✓ Data protection practices
- ✓ Secure configuration of enterprise assets
- ✓ Account management and access controls
- ✓ Continuous vulnerability management
- ✓ Audit log management
- ✓ Email and web browser protections
- ✓ Malware defenses
- ✓ Data recovery practices
- ✓ Network infrastructure management
- ✓ Network monitoring and defense
- ✓ Security awareness and skills training
- ✓ Service provider management
- ✓ Application software security
- ✓ Incident response management
- ✓ Penetration testing practices
- ✓ Security governance program maturity

A practitioner-led evaluation from your fractional CISO (fCISO) team — not a software-generated report.

WHAT YOU RECEIVE

- ✓ Full CIS Controls assessment — all 18 control areas
- ✓ Written report with risk ratings — Critical / High / Medium / Low
- ✓ Prioritized remediation roadmap
- ✓ Executive summary for insurers, regulators & clients
- ✓ Risk Register — initial population
- ✓ 60-minute debrief session

Delivered in 30 days.

INVESTMENT

$7,500
